

Packaged Software Selection

Your Challenge

- Your business has changed, your systems are outdated, time and resources are in short supply
- System workarounds consume more and more time
- New software releases have passed you by, and you need a solution.

Packaged Software Selection Services

Partner with us to provide the following software selection services:

Assess Your Needs

Information Advantage will understand your business goals, growth plans, and organizational readiness to determine your requirements. We'll detail all aspects of your business and processes for review and validation.

Identify Promising Software

We'll thoroughly research the market to recognize viable products and vendors available locally and nationally.

Highlight the Best Solution

We will preview software, validate performance in your business environment and certify vendor claims and service levels.

Benefits

- Unbiased product recommendations from an independent expert based upon a thorough analysis of your specific needs.
- Implementation leadership and staff education focused on features you really need.
- Estimates of productivity increases helpful in building financial justification.

"Our vendor-neutral stance allows us to help you choose the package that fits your organization – your technology, your business, your culture. Make Information Advantage your choice for Software Selection Services."
