

# System Turnaround

## Your Challenge

- Your business has evolved, and legacy systems are failing  
or
- Staff attrition has reduced knowledge and therefore system effectiveness  
or
- System misuse has reduced accuracy of management information.

## System Turnaround Services

Information Advantage Turnaround Services can prolong the life of your existing system investments.

### System Assessment

Information Advantage will understand your business, and analyze legacy system features to determine where inefficiencies exist. We'll identify performance gaps, document manual workarounds, and isolate issues such as data model abuse or lack of staff education.

### Design Enhancements and Add-On's

Once gaps and inefficiencies are identified, Information Advantage architects can design new software features, propose data cleanup or staff education to meet your needs. We'll present a range of options and projected benefits for your review and consideration.

### Turnaround Leadership

Information Advantage professionals will manage your turnaround initiative. We'll take the lead on efforts to renew your systems, clean up poor data or design custom education to bring technical and business staff up to speed.

## Benefits

- Minimize business interruption and staff impact due to system changes.
- Extend the life of your system assets. Preserve complex business rules with minimal investment or rework.
- Cost effective approach. Capital is reserved for projects with higher return on investment.

*"Let Information Advantage help you leverage your significant investment in information technology by designing improvements and add-on's. By improving existing system assets, you'll reduce staff impact due to change, limit business interruption and preserve capital for projects with greater returns."*
